

MULTI-PASS DRYBACK

FIRETUBE BOILERS

Designed for Maximum Efficiency, Reliability and Durability
in Today's Most Demanding Environments.

DAKOTA

- + 2-pass dryback design
- + Pressures from 15-350 psi steam and 30-160 psi hot water
- + Sizes from 100-2,500 BoHP
- + Generous furnace volume for low heat releases & ultra low NOx compliance
- + Compact footprint with X-ID® tubes

APACHE

- + 2-pass dryback design
- + Pressures from 15-350 psi steam and 30-160 psi hot water
- + Sizes from 10-2,200 BoHP
- + Rugged, simple design

AZTEC

- + 2-pass dryback design
- + Pressures from 15-350 psi steam and 30-160 psi hot water
- + Sizes from 30-1,000 BoHP
- + Generous furnace volume for low heat releases & ultra low NOx compliance

SENECA

- + 3-pass dryback design
- + 30-160 psi hot water
- + Sizes from 30-300 BoHP
- + Compact design

MOHAWK

- + 3-pass dryback design
- + Pressures from 15-350 psi steam and 30-160 psi hot water
- + Sizes from 30-1,000 BoHP
- + Generous furnace volume for low heat releases & ultra low NOx compliance
- + Higher efficiency model

Superior Boiler leads the way in the design and manufacture of industrial and commercial boilers for all market segments. With over 100 years' experience in the industry, our customers don't just trust what we build, they trust the people who build them. Complete boiler systems built to exacting standards, **made in the USA**, and installed throughout the world.
